Methodologies

During we class we came up with user stories and agreed upon how difficult they would be to implement.

We were able to assign task to members remotely and in person.

To communicate we made a message group which helped us communicate faster than email.

Architecture Diagram

Design Choices

- **Soft pink and white palette** sets a warm, approachable tone, aligning with the goal of making adoption feel inviting.

- **Black paw print accents and pet related puns** like "Purr-sonality" and "Furr-Ever" reinforce the pet theme subtly but clearly, adding charm without clutter.

- **Rounded buttons and cards** soften the interface visually, making it feel more user-friendly and less rigid.

- **Minimal, clean layout** keeps focus on the pets instead of distracting UI elements.

- **Filter options** for type, age, and size make it easy for users to narrow their search quickly.

- **Clear typography and generous spacing** improve readability and keep the site from feeling overwhelming.

- **Image-first design** prioritizes visuals over heavy text, letting users engage with pets at a glance.

Challenges

Group Challenges

- ❏ Finding Time to Meet up
- ❏ Agreeing on Ideas
- ❏ Communicating our Struggles
- ❏ Working on fundamental aspects of our website
- ❏ Scheduling

Tech Challenges

- ❏ Applying our API's
- ❏ Testing our website functions
- ❏ Getting Docker to run on all our computers
- ❏ Matching people to pets (QUIZ)
- ❏ Merge conflicts
- ❏ Working with Handle Bars
- ❏ Website crashing

Future Scope/Enhancements

Testimonials + Image Upload

Success stories from people who used the site to find a pet, including pictures of pets that were adopted.

Chat functionality

A way for new pet owners to connect with each other and share pet pics using the image upload feature.

Types of User Accounts

Allow rescues and shelters to post pets for adoption; add options for fostering pets and following a specific rescue.
